December 2007

Dear *CPA Journal* Subscriber:

Welcome to the NYSSCPA's 2008 CPA's Resource Guide, which includes *The CPA Journal* annual index. Publishing the 2007 Annual Index as part of the Resource Guide allows *The CPA Journal* to deliver more of what our readers value most — articles with in-depth analysis. The stand-alone presentation also allows you to refer to the Annual Index more conveniently.

Use the Resource Guide to locate products and services you may currently need or have an interest in for the future. The guide is divided into helpful subsections, and will be a resource that you can reach for to improve and expand the value of your services.

The online version of the Resource Guide is updated for comprehensiveness throughout the year and is available at [www.nysscpa.org](http://www.nysscpa.org). *The CPA Journal* Annual Index, can be accessed at [www.cpajournal.com](http://www.cpajournal.com) along with complete archives back to 1989. We hope you will find them useful.

Sincerely,

  
Joanne S. Barry

**ProSystem fx Profit Driver**

ProSystem fx Profit Driver is a financial diagnostic and analytical solution that transforms client data into an interactive strategic planning tool, enabling professionals to instantly show their clients the outcomes of “what-if” scenarios and develop detailed plans for reaching goals. The program provides information that can help firms understand clients and better meet their needs, allowing them to compare business performance against industry standards with benchmarking data functionality.

Profit Driver allows professionals to analyze financial performance for up to 40 consecutive periods and highlight key trends. The program’s powerful reporting features include easy-to-understand graphical illustrations, informative analysis screens, and instant diagnostic reporting written in plain language.

Other features add even more value to Profit Driver. The Xpert feature helps to explain the most complex financial statement ratios and results, and a unique one-page financial scorecard transforms financial statements into one powerful screen with instant calculation of critical results and business drivers. Budget vs. Actual analysis helps firms perform projections as they create budgets, with just the click of a button.

Profit Driver integrates with ProSystem fx Tax Engagement and ProSystem fx Tax, as well as data in spreadsheet form.

**ProSystem fx® Write-Up**

**ProSystem fx® Write-Up** helps firms view and mine data to streamline the day-to-day management of their clients’ operations. Powerful reporting capabilities allow firms to accurately analyze their clients’ financial positions.

The program can also be customized so it works within the existing workflow. Transactions can be coded by departments, divisions, locations, and other categories. Information can be filtered and sorted for customized reports, and the menus and toolbars can be adjusted and personalized.

Write-Up includes a variety of tools to help firms expand their payroll businesses, including signature-ready payroll forms, ready-to-print 1099s, payroll and tax liability reports, and convenient payroll processing. Client bank accounts can be reconciled with one-click access to reveal current or past reconciliations.

Tightly integrated with other solutions offered in the ProSystem fx Office Suite, Write-Up lets end users export data to ProSystem fx Tax for quicker tax return preparation. Customized statements and reports can be exported to ProSystem fx Engagement and Trial Balance, and PDFs of statements and reports can be uploaded into ProSystem fx Document.

CCH

a Wolters Kluwer business

**CCH, a Wolters Kluwer business****Phone: (888) CCH-REPS****Web Site: [CCHGroup.com/Viewplanadvanced](http://CCHGroup.com/Viewplanadvanced)****CCH ViewPlan® Advanced™**

**CCH ViewPlan® Advanced™**, is powerful, yet easy-to-navigate toolkit, that enables practitioners to graphically compare multiple estate planning scenarios. It generates customizable flowcharts, graphs, and reports that summarize planning scenarios for presentations. Modules cover mutual funds, stocks, variable annuities, closed-end funds, and separate accounts.

Its comprehensive estate planning speeds data entry and provides a quick view of charitable gift-giving and other scenarios, supported with vivid graphs and text reports. Graphs, flowcharts, spreadsheet-like calculation reports, and easy-to-understand explanatory text can be arranged in customizable presentations, adaptable to virtually all planning options. A "calculations log" creates an audit trail to help avoid costly errors by presenting how the calculator arrived at given results and quickly identify possible input errors.

ViewPlan Advanced features integration with HotDocs, LexisNexis' document management system. Information such as contact name and title can now be shared between these two programs, saving you time. The ability to export data and reports to both Word (RTF) documents and PDF files enables you to attach and email documents to clients, making communications easier and more efficient. A new customizable disclaimer allows you to create up to four lines of text that can be printed on each output page. In addition, law and rate updates provide the latest state and federal law information.

The power of this application lies in its ability to present virtually an unlimited number of plans, and compare up to three plans at a time to facilitate the presentation of optimal planning techniques to clients. It's a straightforward yet powerful wealth management tool.

CCH, a Wolters Kluwer business, offers the CorpSystem™ suite of solutions to help make sales and use tax compliance — from front-end billing to back-office returns — a single, integrated task with complete and accurate results. Products include:

### Sales Tax Returns Online

This web-based solution offers outsourcing convenience with the ease of online accessibility for companies seeking sales and use tax efficiency. With Sales Tax Returns Online, CCH stores their tax information in its secure servers and completes the forms. The system also lets them review, edit, print and audit tax returns from their desktop computers. Eliminated are the hassles of maintaining complex software or taking staff time for taxes while preserving timeliness and accuracy requirements.

### Sales Tax Online

For retailers with multi-state business or eCommerce activity, Sales Tax Online is a suite of software products that enables them to calculate sales taxes for different locations. With Sales Tax Online, retailers can access the CertiCALC, CertiSHIP, and CertiFile databases online. The suite features the most up-to-date tax tables and sales tax laws. There is no software to maintain or updates to track, which saves merchants' time and headaches.

CCH's ProSystem fx® Tax provides full capabilities for all types of federal and state returns, including individual, partnership, corporation, fiduciary, estate and gift, deferred compensation, and exempt organization. It is the cornerstone of the ProSystem fx Office suite of software. Tax's leading technologies help professionals save time and work smarter.

Modules can be purchased individually or bundled to meet specific needs. ProSystem fx Tax performs automatic calculations, overrides and optimizations for every federal and state return. The industry's most comprehensive diagnostic system tests for omissions and inconsistencies, allowing users to jump back to related input with a single click.

Intuitive navigation panels, pop-up menus and "forms-stepping" features allow quick navigation through a return, and a comprehensive on-screen review system features color-coded tick marks, field and global notes, lists, overrides, and estimates.

The *e-filing* module enables individual, business, and specialty electronic filing. And a full array of value-added options help firms manage their practices, simplify return preparation, and provide revenue-generating services, like the Tax Notebook and Tax Library.

ProSystem fx Tax is tightly integrated with other ProSystem fx Office software, such as Write-Up, Fixed Assets, Profit Driver, and Engagement. It is also highly integrated with popular office software, like Microsoft® Excel® and Word®.
